

CLEANING PROTOCOL FOR DENTAL CLINICS IN QUEBEC

Case Study + Complete Guide

Client: Dental Clinic in Montreal

BY MOM CLEANING

Objectives of the Cleaning Protocol – Dental Clinic in Montreal

Real Case Study – Active Medical Environment, 15 Employees, 3,000 sq. ft.

- Ensure a hygienic environment that complies with Health Canada standards, essential for limiting biological risks.
- Maintain impeccable visual cleanliness to strengthen patient confidence from the moment they arrive.
- Reduce the risk of cross-contamination by applying strict protocols in critical areas (treatment rooms, sterilization center).
- Adapt cleaning procedures to actual patient flow and clinic operating hours to avoid disrupting care.

Profile of the Clinic

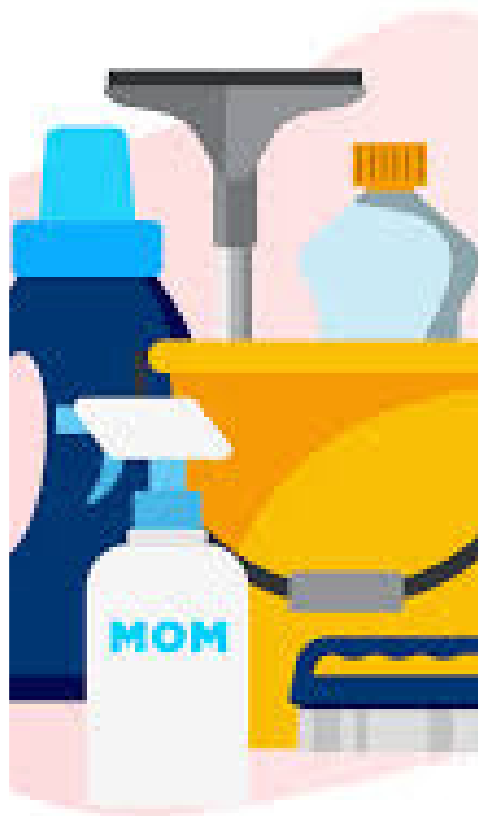

HOMEDENTAL DENTAL CLINIC (Kirkland)

- Type: Multidisciplinary dental clinic (general dentistry – implants – orthodontics)
- Location: Kirkland, Quebec
- Area: 3,000 sq. ft.
- Team: 15 employees

 - 1 manager, 2 receptionists
- Clientele: Adults and children

Areas to Clean and Cleaning Frequency for This Dental Clinic

AREA	FREQUENCY	DETAILS
Reception / Waiting Area	Daily	Disinfection of surfaces, door handles, chairs, and floors
Administrative Offices	Daily	Dusting, waste management, and floor cleaning
Treatment Rooms	Daily	Cleaning and disinfection according to sanitary protocol
Sterilization Rooms	Daily	Protocols established with certified products
Restrooms	Daily	Thorough cleaning and inventory check
Kitchen / Break Room	Daily	Surface cleaning + household appliances and waste management
Floors (All Areas)	Daily	Vacuuming and general floor cleaning with appropriate products

Certified Cleaning Products for the Dental Sector

All cleaning products used by MOM Cleaning are certified for the healthcare sector and sourced from reputable, eco-friendly brands, including InnuScience, MOM Cleaning's preferred supplier.

All cleaning protocols comply with current standards established by Health Canada.

Observed Results

1. Enhanced Professional Image: Patients perceive a clean and reassuring environment.
2. Reduced Cleaning-Related Stress for the Clinical Team: Allows greater focus on patient care.
3. Optimized Operating Time for Clinical Staff: Priority is given to patients, not cleaning tasks.

Client Testimonial – Tangible Results in a Dental Clinic

“

"Although we have internal staff, MOM Cleaning's thoroughness has helped us raise our standards. Their team has an excellent understanding of the specific requirements of the dental field."

— Dr. Nicolas Cohen, Owner of the Clinic

About MOM Cleaning

MOM Cleaning specializes in janitorial services for dental and medical clinics, where precision, hygiene, and regulatory compliance are essential.

Founded in 2004 in Town of Mount Royal, our company also serves other commercial and institutional sectors with the same commitment to quality.
